Election/Restrictions

Claims 1-2, 4-13 and 16 are directed to an allowable product. Upon review of the non-elected invention of claims 14-15 which was previously withdrawn from consideration as a result of a restriction requirement on 3-8-06 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 3-8-06 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 12-20-06 was filed after the mailing date of the first office action on 06-13-05. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Regarding the reference (US 4,579,712) which is lined through on the IDS of 12-20-06, this reference has been previously considered on the PTO-892 mailed 06-13-05.

The following is an examiner's statement of reasons for allowance:

The prior art such as Mori (US 4,579,712) teaches coating compositions suitable for coating piston rings which contain copper, tin and graphite such as is claimed however the prior art does not teach or suggest that the claimed coating composition is formed via a thermal spray. The coating composition of Mori which is formed by applying alloy powder onto the substrate and sintered would have a different microstructure than the thermally sprayed alloy of the present invention.

Kawagoe (US 5,875,702) teaches a similar coating composition which is applied via a thermal spray. However, the prior art such as Kawagoe teaches that the graphite content should be limited to less than 3.0 for such a thermal spray process (col. 10, ln. 38-44). As such, the prior art does not teach or suggest a coating having the claimed composition including a graphite content of at least 5% which is applied via a thermal spray process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason L. Savage whose telephone number is 571-272-1542. The examiner can normally be reached on M-F 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer McNeil can be reached on 571-272-1540. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
